Yes, I was told that the excavator was not locked out correctly. Operator error.
The report should provide more details and how GLDD plans to address the issue.

Thanks, John. One more question -- how was he injured? Was he standing on the barge and the excavator swung and hit him? Or something else?

Stephanie:

CH2M Hill has informed me that the injured worker is expected to be released from the hospital today. Injuries included a dislocated elbow that required surgery and a number of sutures on the bridge of the nose.

GLDD is expected to issue a report at some point Thursday.

Additionally, I have been told that work will start again Thursday in preparation to start deployment of fabric. Hill felt that fabric deployment would not start till Saturday.

I will send out another e-mail related to the meeting next week. I will suggest we change the conference call to Tuesday at 10:00 AM.

Hi John,

Could you please let us know how the injured worker is doing, and the circumstances of the accident. I understand you're completing a full evaluation, but a quick, brief update would be helpful. The following article was published and we are getting questions:

<http://cliffviewpilot.com/lyndhurst-firefighters-ems-rescue-passaic-river-barge-worker-struck-by-boom/>

Also, I know I accepted the call for next Wednesday, but this will not work for EPA or CDM. Could we talk on Tuesday morning or Thursday morning before 10?

Thanks,

Stephanie
